Education

BITS Pilani, Pilani

Nov 2021 – May 2025

B.E. (Hons.) in Electronics And Instrumentation

Experience

MTS-1 - Nielsen

July 2025 – present

- **Ad Creative Pipeline:** Using Python, Bedrock to extract brand, product, and advertiser from video creatives.
- **Tech Using:** Using S3, Gemini (audio), Bedrock (AI), and hashcode similarity for accurate creative matching.

SDE Intern - Argenbright Innovation Labs

June 2024 – Dec 2024

- **Face Verification App:** Built React Native app using Vision Camera and Flask API for real-time face verification.
- **Backend Verification:** Used DeepFace and Haar Cascade XML for face verification, containerization with Docker.
- **AWS Deployment:** Deployed verification pipeline with S3, Lambda, API Gateway, ECR and ECS Fargate.
- **AI web app:** Reactjs, Leaflet.js, Geocoding APIs to visualize crime rates and provide tailored response via LLM.
- **Modular Architecture:** Utilized Next.js and LangChain for dynamic, context-aware on crime responses.

Web Development Intern - Indian Red Cross Society [website](#) [🔗](#)

May 2023 – July 2023

- **Led Development Team:** Built MERN Stack Blood Donation Website for donor requests and registration.
- **Integrated IRCS database:** APIs to integrate real-time feedback and donor input, boosting efficiency by 75%.
- **Technologies Used:** HTML, CSS, JavaScript, Reactjs, MongoDB, Postman API, MERN Stack, NodeJs, Express.

Projects

LitedIn [🔗](#) - Web Development

[github](#) [🔗](#)

- **Developed Interactive Platform:** Integrated MERN stack with real-time issue tracking for **5000+** students.
- **Created Room Layouts:** Displayed resident details for easier navigation, improving efficiency by 100%.
- **Technologies Used:** MERN, React, Tailwind, Prisma to support admin-user panels and real-time issue tracking.

Insurance Premium Default Prediction- Machine Learning

[kaggle](#) [🔗](#)

- **Developed Predictive Model:** Using customer data and premium history with machine learning algorithms.
- **Optimized Outcomes:** Achieved 95.62% accuracy with Random Forest for proactive default management.
- **Technologies Used:** Python, Pandas, Logistic Regression, Decision Trees, Random Forest for data analysis.

Cab Booking System - Object-Oriented Programming

[github](#) [🔗](#)

- **Developed Cab Booking System:** Used Composite design pattern for managing complex structures.
- **Implemented OOP and SOLID:** Ensured scalability and multithreading in Command Line Interface.
- **Enhanced Efficiency:** Integrated real-time booking and dispatch, improving performance and user experience.

Technical Skills

Languages: C++, JavaScript, Java, Python

Frameworks and Libraries: React.js, Express.js, Tailwind CSS, Flask API, OpenCV

Technologies and Tools: AWS S3, API gateway, Docker, ECR, ECR, Node.js, MongoDB, API Testing, Postman, Git, GitHub, Ngrok, K6 Testing, Machine Learning.

Others: DSA, OOPS, Database Management Systems, Computer Networks, Operating Systems.

Competitions / Achievements

- **Leetcode** [🔗](#) 200 DAYS BADGE Solved 485+ questions SQL 50 BADGE (DP, LinkedList, Trees, Graphs, Recursion).
- **GFG** [🔗](#) 150+ Questions Ranked **200th** among 10K registered BITS students.
- **HEREvolution Codefest Hackathon** Web app with HERE API Level 2 among 1500+ college participants.
- **Flipkart GRiD 5.0's Tech Quiz** Level 2 clearance, Software Development Track Among **1.46 lakh** participants.
- **Pitching Coordinator** in the Department of Scholarship and Collaboration at BITS Pilani.
